TECHNICAL SKILLS

Programming

C C++ JavaScript (Basic)
TypeScript (Basic)
Python (Basic)

Web Development

HTML CSS React (Basic)
Tailwind CSS

Database

PostgreSQL (Basic)
MySQL (Basic)

Tools & Workflow

Git GitHub VS Code
ClickUp AI-Assisted Dev

Academic Exposure

Blockchain concepts
Hyperledger Fabric (concepts)
ML workflow (academic)

Office & Computer Skills

MS Word MS Excel
MS PowerPoint Google Docs
Google Sheets
Email & Browser Tools
File Management
PDF Handling Data Entry
Windows & Ubuntu

LANGUAGES

Bengali ●●●●●
English ●●●●●
Hindi / Urdu ●●●●●

CERTIFICATIONS

Fullstack Blockchain
Development
NonAcademy — Batch 02
2025

CAREER OBJECTIVE

Computer Science and Engineering graduate from International Islamic University Chittagong (IIUC) seeking an entry-level opportunity in any IT-related or technology-driven field. Practical experience in web development projects using React, Hono, and PostgreSQL. Comfortable with computer operation, documentation, data handling, team collaboration, and learning new tools quickly. Open to roles in web development, IT support, software QA, data entry, computer operation, technical support, MIS, customer support, or any position where my technical background and eagerness to learn can contribute to the organization.

EDUCATION

Bachelor of Science in Computer Science & Engineering (CSE)

International Islamic University Chittagong (IIUC)

2021 – 2025

CGPA: 3.367 / 4.00

Higher Secondary Certificate (HSC) — Science

Hazera-Taju University College

2018 – 2019

GPA: 4.33 / 5.00

Secondary School Certificate (SSC) — Science

CDA Public School and College

2016 – 2017

GPA: 5.00 / 5.00

PROJECTS

Tamurfood – B2B Bakery Ordering Platform

Solo Project · Deployed for Demo | 2026

github.com/abdullahxDNA/Tamurfood

Tools used in project: React 19 · Hono · Bun · Better Auth · PostgreSQL · Drizzle ORM · Server-Sent Events · Tailwind CSS · TanStack Router

- Built and deployed (for demo/testing) a **full-stack B2B ordering platform** for a neighbourhood bakery — nearby shops order from a live menu and staff fulfil and deliver in real time.
- Wrote the PRD, designed the full data model and role-based workflows, and built the entire monorepo from scratch (Bun workspaces, Hono API, React frontend, Drizzle ORM, PostgreSQL).
- Implemented **real-time order updates (SSE)**, a per-shop "Khata" credit ledger with partial payments, concurrency-safe inventory, an analytics dashboard, and three-tier role-based access (admin / moderator / shop).
- Security-hardened with Row-Level Security, rate limiting, and env validation. Used Claude Code (AI coding assistant) as part of the development workflow.

Front-End Development
EDGE Project – CUET, Bangladesh
Computer Council
Aug – Dec 2024

Introduction to Blockchain
Technology
Ostad Platform

Online Leadership Course
Aspire Leaders Program
March 2023

SOFT SKILLS

- Team Collaboration
- PRD & Feature Planning
- Technical Documentation
- Problem Solving
- Adaptability
- AI Tool Usage

DeshGhuri – Travel Marketplace Platform

Team Project | 2025–2026

github.com/samin124/DeshGhuri

Tools used in project: React · TanStack Router · TanStack Query · Hono · Better Auth · PostgreSQL · Drizzle ORM · Tailwind CSS · shadcn/ui · Bun

- Wrote the product requirement document (PRD) and managed feature breakdown in ClickUp with teammates.
- My main contribution: built the **seller authentication routes** (signup, signin, session management) using Hono and Zod validation.
- Built the **seller dashboard backend API** — stats, revenue summaries, bookings, and listing analytics using Drizzle ORM and PostgreSQL.
- Implemented the **admin verification system** for seller applications and replaced Cloudinary storage with Supabase Storage.
- Developed seller-side UI components: dashboard layout, onboarding steps, status badges, and pagination in React.
- Collaborated with 2 teammates using Git branching, pull requests, and code review workflow.
- Used Claude Code (AI coding assistant) as part of the development workflow.

Blockchain-Based Agricultural Food Supply Chain

University Thesis | 2024–2025

github.com/abdullahxDNA/agrifood-blockchain-hyperledger

Tools used in project: Hyperledger Fabric · Go (AI-assisted chaincode) · Docker · CouchDB · Ubuntu

- Designed the traceability workflow covering farmer → retailer → customer lifecycle with role-based access.
- Understood and documented Hyperledger Fabric concepts: organizations, peers, channels, endorsement policy, and distributed ledger.
- Set up the Fabric network environment with Docker and contributed to testing and verification scenarios.
- Go chaincode was implemented with AI assistance; my focus was workflow design, concept understanding, documentation, and thesis presentation.

Lung Cancer Detection Using Ensemble CNNs

University Project | 2025

github.com/abdullahxDNA/lung_cancer_prediction_using_ML

Tools used in project: Python · TensorFlow / Keras · Xception · ResNet50 · Scikit-learn

- Academic project combining Xception and ResNet50 models for medical image classification.
- Worked on dataset preparation, training workflow, and evaluation metrics as part of a university team.
- Learned ML fundamentals and deep learning pipeline concepts through this project.
- *Note: This was an academic learning project; I am not currently practicing ML/AI development.*

ACHIEVEMENTS & ACTIVITIES

- ▶ **Top 10 Finalist – Hult Prize at IIUC 2023:** Developed a business plan, market analysis, and social enterprise pitch as part of a competitive team challenge.
- ▶ **Honorable Achievement – Face The Case 3.0, IEEE CUET Student Branch:** Recognised for analytical thinking and problem-solving in a national case competition.
- ▶ Active in IIUC Biz Communication Club and represented in Interactive Cares Career Fair 3.0.
- ▶ Participated in university business strategy and brand competitions; member of student tech and debate clubs.
